

## Skills

React.js, Redux, JavaScript, Python, Java, HTML5, CSS3, PostgreSQL, MongoDB, AWS, Heroku, Docker

## Featured Projects

### Charkoots

[Live](#) | [ReadMe](#)

Python | React.js | Redux | PostgreSQL | Mockplus | Heroku

*A web service that pairs wines based on build-your-own charcuterie board's taste profile*

- Constructed a wine pairing algorithm to instantly match the best wine possible based on dominant taste profile of selected board items, allowing users to find the perfect wine
- Implemented a user-friendly navigation experience via featuring Material-UI's drawer component, which enables users to easily interact with application's available functionalities

### Codezvous

[Live](#) | [ReadMe](#)

Python | React.js | Redux | PostgreSQL | Heroku

*A niche Meetup clone for programmers to browse and attend programming-related events*

- Formulated a full-scale seeder data using Faker and Random for data efficiently and robust demo experience
- Achieved personalized landing page displaying user's groups and events via React useEffect hooks

### GoodLaughs

[Live](#) | [ReadMe](#)

JavaScript | Express | Pug | PostgreSQL | Heroku

*A Goodreads clone designed to post and share jokes with other users*

- Orchestrated interactive components and API routes for users to curate personal feeds, leave comments and reviews to promote engaging social networking experience
- Programmed an Express session middleware to handle user validation and authentication for security
